

Summary

Motivated and detail-oriented Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and React.js. Passionate about building responsive and user-friendly web applications with a keen eye for UI/UX design. Adept at collaborating in team environments and eager to apply technical skills to real-world projects. Seeking an opportunity to contribute and grow in a dynamic development team.

Experience

Bluestock Fintech, Pune

June 2025 – July 2025

Software Development Engineer (Intern)

- Developed and optimized frontend modules in React.js and improved UI consistency using Material-UI and Tailwind CSS.
- Implemented REST API integrations for financial and stock data, reducing API response latency by 20%.
- Built secure authentication/authorization flows with JWT, ensuring data privacy and compliance.
- Enhanced backend performance by optimizing Express.js routes and reducing redundant API calls.
- Collaborated with product managers, senior developers in an Agile (Scrum) environment.
- Utilized Git/GitHub for version control and contributed to team code reviews, ensuring high-quality code delivery.

Katyayani Organics, Bhopal

July 2025 - present

React.js (Intern) → Retailer Sales Management Platform – Global Connect

- Developed and enhanced a retailer-focused sales management web application for handling deals, customer profiles, farm details, and shipping calculations.
- Implemented features like deal pipeline tracking, customer engagement module, farm information dashboard, and shipping cost calculator.
- Integrated REST APIs to fetch and display dynamic sales, customer, and product data.
- Built UI components using React.js, Tailwind CSS, Material UI, MUI DataGrid, and Lucide icons ensuring responsive and user-friendly experience.
- Improved data visualization and user experience by implementing progress tracking, tables, and detailed customer profiles.

Technical Skills

- Languages: JavaScript (ES6+), HTML5, CSS3
- Frameworks/Libraries: React.js, Tailwind CSS, Material UI, MUI DataGrid
- Tools: Git, GitHub, Postman, VS Code
- Database (Basic): MongoDB, MySQL

Project

1. MiNiMart | JavaScript, React.js

- Developed and optimized frontend modules in React.js and improved UI consistency using Material-UI and Tailwind CSS.
- Implemented REST API integrations for financial and stock data, reducing API response latency by 20%.
- Built secure authentication/authorization flows with JWT, ensuring data privacy and compliance.
- Enhanced backend performance by optimizing Express.js routes and reducing redundant API calls.
- Collaborated with product managers, senior developers in an Agile (Scrum) environment.

Achievement and Affiliation

- Completed (Full Stack Web Development)
Sheryans Coding School, Bhopal

Education

Sam Global University, Bhopal

2022 - 2025

Bachelor's Degree in Computer Engineering - 7.8 CGPA
